## ATAIR – THE EXPERTISE BEHIND PROVITAL

If you feel comfortable in **support knee high or comfort socks from provital**, this is first and foremost due to the experience and expertise of the manufacturer behind this brand: Atair. The Atair Group, founded as a family-owned operation in 1986, now employs over 500 employees. As a leading producer of legwear in Germany and Europe, we produce fine and cotton socks, stockings and tights for women, men and children. From classic and contemporary fashion items to functional legwear.

Under our **provital** brand, we sell venous-activating support knee high and comfort socks of high quality, which are marked by their unique effect and exceptional wearing comfort.

This range of functional items is exclusively available at an attractive price at pharmacies.

## OUR BEST OFFER: HEALTH

Healthy, full-fledged nutrition, lots of exercise and sport during leisure time, the trend towards wellness and spa experiences – Health plays a key role in our lives. Unfortunately we often forget our legs in the process. But they literally play a supporting role for our well-being.

Since we are often “on our legs a lot” in everyday life, we inevitably put a lot of strain on them: Monotonous standing or sitting strains the veins and the blood accumulates. The venous walls are stretched and weakened by the constant strain. As a result, the venous valves suffer and can no longer close properly so that even more blood settles downward. Returning the blood from the legs to the heart becomes very difficult work for the veins – the results are heavy, swollen or tired legs. In addition, low air pressure during flights, low humidity and an insufficient supply of liquids can impair the blood coagulation. In the worst case, this leads to a permanent venous weakness with varicose veins, spider veins and persistent pain. Even thrombosis can occur. Unless you prevent it! For example with a healthy and active lifestyle and by wearing the venous activating **support knee high or comfort socks from provital**.

### HEALTH PROBLEMS

There are million people suffering from chronic venous weakness. The first warning signs are:

- Varicose veins
- Heavy, tired or nervous legs (especially in the evening)
- Cramps in the calf (at night)
- Swollen legs or ankles
- Spider veins
- Persistent pain

## PROVITAL – WELL-BEING AT EVERY TURN

Whether women or men, whether at work, during leisure time, when travelling or for particularly sensitive legs, you are always and everywhere well taken care of with **travel support knee high and comfort socks from provital**.

- **Travel support knee high – specifically designed for long journeys**
- **Support knee high – for everyday life**
- **Comfort socks – for sensitive feet**

**provital** offers you a comprehensive range of products that are characterised by high material quality, optimal adaptation to the body and an exceptionally good wearing comfort. Visually, they do not differ from conventional stockings and socks and fit in every wardrobe. With their active supporting effect, support knee high from provital reduce the swelling in your legs and thus prevent pain. This means you feel good, all day long.

### HOW SUPPORT KNEE HIGH PROVIDE RELIEF

A support knee high works as much simple as effective. The outwardly-acting, precisely defined, mechanical pressure profile working from the ankle upwards in a decreasing manner naturally causes a reduction of the venous diameter. The venous valves can close better, which means better blood circulation. During movement, the support knee high also has a resistance for the muscles, which can therefore work more effectively.

## TRAVEL SUPPORT KNEE HIGH

### A PROBLEM THAT YOU SHOULD NOT UNDERESTIMATE

Long journeys, whether by car, train or airplane, are also a burden for healthy legs and increase the risk of developing venous pain, such as varicose veins or spider veins. The strain on the veins is initially caused by heavy legs and later by swelling, increased pain or calf cramps.

Returning the blood from the legs to the heart becomes a problem for the veins. This can very easily be prevented – with **travel support knee high from provital**.

### A SOLUTION THAT MAKES EVERY TRIP EASIER FOR YOU

Thanks to the upward decreasing pressure profile, **travel support knee high from provital** prevent the blood circulation from weakening in the leg veins and thus prevent possible symptoms such as tired and heavy legs. So don't just treat yourself, but also your legs to a pleasant holiday season and pack **travel support knee high from provital** in your travel bag.

### HEALTHY VEIN QUALITY FOR EVERYBODY

The **travel support knee high from provital** are comfortable to wear. The special wearing comfort is achieved through the very high cotton content of 63%.

#### The high quality is characterised by:

- Strong supporting of 14–16 mmHg
- Wide, non-constricting cuffs
- Reinforced heel
- Soft tip with flat seam
- No visual difference to normal stockings / socks
- Can also be worn by people with allergies
- Available for men and women

at pharmacies

## SUPPORT KNEE HIGH

### YOUR LEGS HAVE A DIFFICULT JOB – PROVITAL MAKES IT EASIER FOR THEM

Whether in retail, gastronomy, an office job or field work: Those who have to stand or sit for prolonged periods of time at work know the feeling of tired, heavy and swollen legs. It's no surprise, because the leg muscle pump is often not sufficiently active, the blood accumulates in the legs and the return transport to the heart is thereby made more difficult. The result: Serious venous diseases may result. It's good that you can provide with the **support knee high from provital** exactly the relief that your legs need during work. Because support knee high from provital have a revitalising effect and provide your legs more freshness, lightness and energy.

### SIMPLY TAKE THE PRESSURE OUT OF WORK

Thanks to the upward decreasing pressure profile, **support knee high from provital** prevent the blood circulation from weakening in the leg veins and thus prevent symptoms such as tired and heavy legs. So simply take the pressure off your legs during daily work and make your difficult everyday life easier with **support knee high from provital**.

### PERFECT FIT – PLEASANT WEARING COMFORT

The following characteristics provide for a particular wearing comfort:

- Extra-wide, soft and non-constricting comfort band
- Perfect fit for the foot due to the stitched and reinforced heel
- Soft, reinforced tip with flat seam

The high quality is characterised by:

- Active supporting effect throughout the day
- Gentle massage for your legs
- The swelling of the legs is reduced
- Tired and heavy legs are prevented
- No visual difference to normal stockings / socks

You can choose between two types of support:

Supporting strength	light	medium
Pressure on the heel	6-9 mmHg	10-14 mmHg
DEN	40	70
Look	transparent	semi-transparent
Colours	Powder, Pearl	Powder, Black

PRODUCT RECOMMENDATION DEPENDING ON THE STRESS LEVEL AT WORK

## COMFORT SOCKS

### FINALLY NO LONGER FEEL ANY PRESSURE – THANKS TO PROVITAL

Are you one of those people who have particularly sensitive skin? Or are you even perhaps a diabetic? Then you know the discomfort that even the smallest disturbing-touches on your feet can trigger. Annoying pressure points from the tight sock cuff are particularly uncomfortable in this case.

**Comfort socks from provital**, on the other hand, are the purest comfort, because they are virtually not felt on your feet and on your calves. The extra-soft and comfortable collar makes this possible as well as the fact that comfort socks from provital do not have any abrasive interior seams and a soft tip with a flat seam. And they are therefore ideal for diabetics as well.

### EXTRA-SOFT – A BENEFIT FOR SENSITIVE FEET

Comfort socks from provital are characterised by:

- Pleasant, soft wearing comfort
- Breathable due to the high cotton content
- Perfect fit

Comfort socks from provital are therefore also suitable for diabetics.

### PROVITAL COMFORT SOCKS – CHARACTERISED BY MANY BENEFITS

Suitable for diabetics

Tested for harmful substances (Oeko-Tex Standard 100)

Fits well, shape stability and durability thanks to Lycra®-quality
